Name of competent authority	Dutch Authority for the Financial Markets is responsible for supervising ABN AMRO in relation to this Key Information Document.
Date of production of the KID	09 May 2025

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type	Over-the-counter (OTC) derivative. An OTC derivative is a bilateral agreement between you and ABN AMRO, whereby commitments depend on the performance of an underlying asset (foreign exchange rate). An OTC derivative is not tradable on a regulated exchange.
Term	The maturity date (expiration date) of the product will be agreed upon when entering into the DCD with Knock-In Barrier contract, with the intention of holding the DCD with Knock-In Barrier until the maturity date.
Objectives	<p>In a Dual Currency Deposit ('DCD') you can temporarily place an amount in a given currency. You receive a higher interest rate compared to a regular deposit in the same currency. In return for this higher interest rate, you give the Bank the right to repay you in a different currency at an agreed foreign exchange rate ('conversion rate'). If, at the expiry time, the conversion rate is equal to the market rate or less favourable to you than the market rate, the Bank will repay you in the other currency, applying the conversion rate. The interest is paid to you in the original currency.</p> <p>In addition to the conversion rate, you can also include a "threshold rate" (Knock-In Barrier) in a DCD. This is the DCD with Knock-In Barrier. The Bank will only repay you in the other currency if the market rate reaches or passes the threshold rate. If the threshold rate has not been reached, you will be repaid in the original currency. This gives you a better protection against the risk of being repaid in the other currency. However, the conversion rate will be less favourable than the conversion rate for a DCB without a threshold rate.</p> <p>Please note: the amount you put into a DCD with Knock-In Barrier can never be withdrawn before the end date. With the DCD with Knock-In Barrier the Bank could repay you in the alternative currency of your choice.</p> <p>The DCD with Knock-In Barrier can be used for investment purposes.</p> <p>The amounts and other details in this document are used for indicative purposes. The calculations assume a nominal amount of EUR 10,000.00, GBP/USD as the currency pair and a term of 1 month. These details probably differ from the ones in your agreement with ABN AMRO. The example is for illustrative purposes only.</p>
Intended retail investor	<p>This product is intended for retail investors who would like to use this product for investment purposes. This product is suitable for retail investors that have sufficient knowledge of and experience with this product, its performance and the risks associated with it.</p> <p>To make sure you understand the performance of and risks associated with this product, please consult the information provided in the relevant product information document. This product is intended for retail investors that are willing and able to bear a total loss of their investment, and accept the credit risk of the issuer and have a minimum investment horizon consistent with the maturity date of the product.</p>

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 1 month. **You may not be able to cash in early. You may have to pay significant extra costs to cash in early.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a medium-

low level, and poor market conditions could impact the capacity of ABN AMRO to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** For legal reasons, no account is taken here of whether you actually need or will receive foreign currency. This product does not include any protection from future market performance so you could lose some or all of your investment. If ABN AMRO is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		1 month
Example investment:		EUR 10,000
		If you terminate after 1 month
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose all of your investment.	
Stress	What you might get back after costs	EUR 8,566.00
	Average return	-14.34%
Unfavourable	What you might get back after costs	EUR 9,484.00
	Average return	-5.16%
Moderate	What you might get back after costs	EUR 9,973.00
	Average return	-0.27%
Favourable	What you might get back after costs	EUR 10,206.00
	Average return	2.06%

The scenarios shown illustrate how your investment could perform. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be cashed in. If you exit the investment earlier than the recommended holding period you do not have a guarantee and you may have to pay extra costs.

What happens if ABN AMRO is unable to pay out?

This product is not covered by any guarantee scheme. This means that in case the PRIIPs manufacturer is unable to pay out due to bankruptcy or an administrative measure of the competent authority, you could incur a significant loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return).
- EUR 10,000 is invested

	If you end at the end of the recommended holding period
Total costs	EUR 100.00
Cost impact (*)	1.00%

(*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

Composition of costs

One-off costs upon entry or exit		If you terminate after 1 month
Entry costs	1% of the amount you pay in when entering this investment. These costs are already included in the price you pay.	EUR 100.00
Exit costs	We do not charge an exit fee for this product.	EUR 0.00
Ongoing costs		
Management fees and other administrative or operating costs	We do not charge management fees and other administrative and operating costs for this product.	EUR 0.00
Transaction costs	We do not charge transaction costs for this product.	EUR 0.00
Incidental costs taken under specific conditions		
Performance fees and carried interest	We do not charge performance fees for this product.	EUR 0.00

How long should I hold it and can I take money out early?

The holding period is the same as the term of the product.

It is not possible to terminate a DCD with Knock-In Barrier before its end date or to transfer to another party. You will also not be able to transfer the amount you have deposited to another account.

How can I complain?

If you are not satisfied with a service we provide, you can either contact our consultants or contact ABN AMRO by telephone 24 hours a day, 7 days a week on 0800 - 024 0712 (free of charge) or, if you are calling from abroad, on +31 10 241 1723. You can also go to our website: www.abnamro.nl/nl/zakelijk/service-contact.html or send an email to klachten.abnamro@nl.abnamro.com. If you are not satisfied with the response, you can write to ABN AMRO Bank N.V., Klachtenmanagement (HQ 1125), P.O. Box 283, 1000 EA Amsterdam.

Other relevant information

Before entering into any transactions, you are recommended to consult the Product Information Document: “Product Information for Foreign Exchange Management”. You can request this from your contact or find it on www.abnamro.nl.

The amounts and other details in this document are used for the purposes of illustration. These details will probably not be the same as in your agreement with ABN AMRO. We recommend that you consider all the information provided to you by ABN AMRO before taking a decision. Please address any questions or comments to your ABN AMRO contact.
